How accurate is the data?

General · https://postcodex.io/docs/how-accurate-is-the-data/

Our data is provided by the top providers in the UK including Ordnance Survey, Royal Mail PAF and several others. All postcode data is derived from the coveted Royal Mail PAF with over 30m UK address and over 3000 daily updates , this is the de-facto standard for accurate postcode to address lookups.

Only approved solutions providers can provide PAF data so you can be assured you are in the safest hands possible.

Our database is updated regularly but in the event your lookup returns no results, you will not incur credit charges for the lookup.
